PROFILE

Computer Science student with a strong foundation in programming, data structures, and problem-solving. Eager to apply technical skills and learn new technologies through practical experience

LANGUAGE

English
Hindi
Marathi

PROJECT

Flipkart(frontend)

"Developed a responsive and feature-rich frontend for an e commerce platform, inspired by Flipkart's user experience." (Good for general applications) By using HTML ,CSS

Hospital Management System

This system simplifies patient entry and exit processes by efficiently managing patient records. It allows storing complete patient details such as entry time, disease information, and other medical data, along with comprehensive records of hospital staff.

Expense Tracker Desktop Application

Developed a professional Expense Tracker Desktop Application using Python, Tkinter, SQLite, and Matplotlib. Implemented secure login/signup authentication using Bcrypt, expense and income tracking, interactive charts, monthly reports, CSV/PDF export, profile management, dark mode, and backup/restore functionality.

Technologies Used: Python, Tkinter, SQLite3, Matplotlib, bcrypt, ReportLab, Git, GitHub

EDUCATION

Bachelor's degree of computer science

MGM's cs & it, Nanded
2027

HSC

NSB High school panbhoshi,loha
Grade 83.33%
2020

SKILLS

- Python
- HTML
- CSS
- Core java

ACHIEVEMENTS

Award/Achievement

Python programming certification
In Infosys
2023

Award/Achievement

HTML programming certification
in Infosys
2023

HOBIES/INTREST

Travelling
Swimming
Sports
Tracking
